

Mark V 500 table conversion to router table

compliments of Doug Reid

NOTE: THIS CONVERSION IS FOR THOSE WHO ARE UPGRADING THEIR OLD MARK V 500 SYSTEM TO THE NEW 510 OR 520 SYSTEM AND WHO WANT TO USE THE OLD PARTS. AFTER INSTALLING THE NEW CARRIAGE AND REINSTALLING THE HEADSTOCK, INTALL THE OLD CARRIAGE TO THE LEFT OF THE HEADSTOCK. YOU CAN THEN MOUNT THE OLD TABLE WITH THE ROUTER AND USE YOUR OLD RIP FENCE AND MITER GAUGE WITH THE ROUTER TABLE. YOU CAN ALSO USE THE OLD TABLE AS A PLACE TO MOUNT YOUR SHARPENING GUIDE OR FOR EXTRA SUPPORT~~DOUG
