

Lathe Duplicator Cutter

555278

Cone, 1/2", Steel

Use for an extremely smooth finish on soft and hard woods, initial shaping, graceful curves, cove cuts, dishing.

555211

Triangle, 60°, Carbide

Universal cutter-use for rough shaping through medium detailing.

555213

Diamond, 35°, Carbide

Use for fine beads, deep intricate details, sharp corners, V-grooves.

555210

Round, 1/2", Carbide

Use for initial shaping, graceful curves, cove cuts, dishing.

555212

Square, 3/8", Carbide

Use for square corners, grooves, straight cylinders, short dowels, plugs.

All four follower shapes are included with each cutter. Use the follower that matches the profile of the cutter herein. **Save the extra followers.** When you purchase the other cutters, you will have spares if followers become worn, damaged or lost.

The cutters will remain sharp for a long period of time. When cutters dull replace them. They are economically priced. **DO NOT grind cutters.** Grinding carbide is hazardous. Grinding steel will change the size and profile, it would no longer match the follower, resulting in an inaccurate cut.

WARNING

DO NOT grind the carbide cutters. The dust generated by grinding the carbide can cause eye and skin irritation as well as respiratory system and internal organ damage.
