

TABLE HEIGHT CRANK HANDLE SUPPLEMENT

The Table Height Crank Assembly on your Carriage has been improved since the Mark Owners Manual was last printed. This Handle Assembly is used to raise and lower the Worktable and is shown on page B3, item #33 in Terms to Know. The parts list shows these parts as part number 514330 (reference numbers 172, 173 & 174) and can be found on page C-9 of your Owners Manual.

The improved Table Height Crank Assembly has a new, precision ground Shoulder Screw (523090) that replaces the Handle Shaft #173 (513418). In addition, three Fiber Washers (523091) have also been added under the head of this new Shoulder Screw, inside the Handle, for precise handle rotation.

Please make note of these new part numbers on page C-9 of the Parts List in your Owners Manual.
